

For VS code Installation use the link

<https://code.visualstudio.com>

Download for Windows

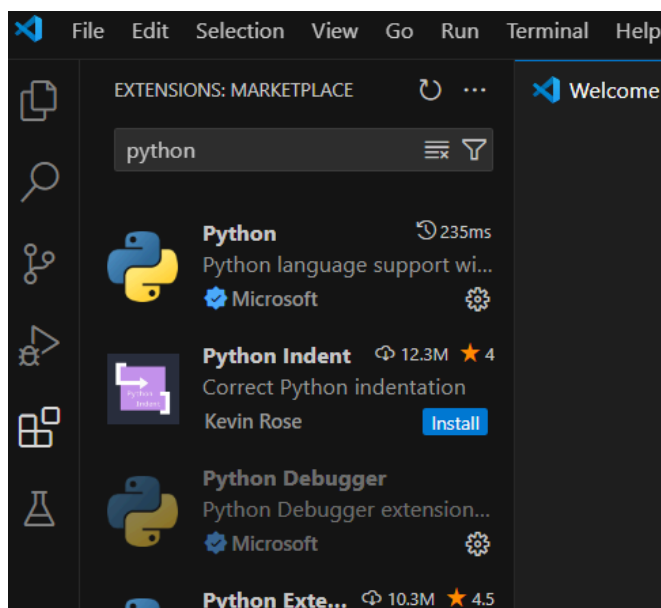

Your code editor. Redefined with AI.

Download for Windows

Get Copilot Free

[Web](#), [Insiders edition](#), or [other platforms](#)

Also Download the python extension as required. Also if we click on sign in with copilot for free it sets up both github and also copilot

A saved python file can directly be executed in the command terminal after installing python

```
C:\Users\lavan\OneDrive\Desktop\Python_Practice>python Hello_World.py  
Hello Python World
```
